

Procedure for installation of systems & availing MNRE subsidy

Beneficiaries interested in installing systems should write to the manufactures/ suppliers indicating their requirement of steam for specified applications, existing arrangement with fuel consumption for meeting that requirement, shadow free space available for installing the solar system etc for obtaining the cost and technical details of proposed solar system. List of manufacturers is available on MNRE website. Based on the details received, the beneficiaries may identify one of the suppliers and generate proposal in association with State Nodal Agency of respective State/ Accredited Manufacturer of MNRE. The proposals generated may then be submitted to MNRE by State Nodal Agencies / Accredited Manufacturers in the prescribed format and as per the guidelines given on MNRE website. The proposals will be examined by a committee in MNRE with sanctions issued to all concerned. Based on the sanction, systems will be installed at beneficiaries site and subsidy released directly to the beneficiaries after 3rd party inspection on completion of the systems with required documents submitted to Ministry.
